**Subject: Draft Final SI/SIP Package
Texas Instruments, Inc. - Attleboro, Massachusetts**

SDMS DocID 587431

Dear Nancy:

As per your instructions, I am forwarding a copy of the Draft Final SI/SIP Package for the Texas Instruments site in Attleboro, Massachusetts to you for additional review prior to distribution to the MADEP and the site owner. We have incorporated text changes per your comments, and we have addressed the following issues:

- a paragraph has been added at the end of each pathway section to summarize whether a release has been documented and if any sensitive environments or receptors were affected;
- details of each groundwater sampling event have been moved to the Groundwater Pathway section of the SI/SIP report;
- a description of each on site surface water body has been added to avoid confusion; and
- discussions regarding initial discovery of groundwater contamination and TCE attribution to the Texas Instruments site were revised to make report more clear.

Comments from Texas Instruments have been incorporated; the MADEP did not submit comments. Also attached is an annotated copy of both EPA Region I's and Texas Instruments' comments which notes Stone & Webster's disposition of each comment.

We would be happy to address any further comments you may have. If you have any comments or questions regarding this submittal, please contact me at (617) 589-5383.

Very truly yours,

Lisa K. White for

Larry S. Cohen
Project Manager
